Peter,

Here is the letter requesting an extension for the surety as discussed today.

Thanks for answering our questions during today's conference call.

Best,

Jane

SLC, UT, 84116

Dear Mr. Brinton,

U. S. Gypsum will be proceeding with the process to obtain a reclamation surety in the total amount of \$1,574,000. This is the amount proposed by U. S. Gypsum in December 2014 and confirmed in your letter dated May 27th, 2015. This amount was confirmed by both U. S. Gypsum and yourself during today's WebEx conference. Our intention is to obtain the bond by July 31st, 2015. However, U. S. Gypsum requests an extension of that deadline in the event that the process of acquiring the surety extends beyond July 31st, 2015. U. S. Gypsum will keep UDOGM informed of their surety progress. Additionally, as discussed, U. S. Gypsum will provide updates to UDOGM with regard to the progress of addressing the comments in the Review of Notice of Intention to Commence Large Mining Operations.

If you have any questions regarding the request for an extension or U. S. Gypsum's progress, please let me know.

Best regards,

Jane Mathisen
